Re: Road Crossing for Star Production, Inc.
Englart Road
Tom Green County, Texas

Dear Judge Brown:

Attached please find engineering diagrams and surveys showing a proposed road crossing for oilfield gas and water flowlines located in Tom Green County, Texas. One of the flowlines will convey produced water from Star Production's Powell and Matschek leases to Star Production's Lee lease for underground injection. The other flowline will transport low pressure gas from battery to battery for lease use or sales as necessary. The crossing will consist of an 8 5/8" conduit with 1/4" wall thickness and will house three poly-pipe pipelines. The conduit will be buried below East Englart Road in a 48 inch deep trench and will have two inch vertical vents installed on each side of the road bed. The crossing will be located under East Englart Road at a distance 2075' west of the intersection of East Englart Road and Schriever Road.

We have enclosed a check for \$500.00 for the road crossing fee. Should you have any questions concerning this matter please contact Scott Henderson at 325-437-9747 at the office of Napier Engineering Inc. or on his cell phone at 325 668-9124. I can be reached at 325 437-9747. Scott will be handling all of the logistics on the road crossing.

Sincerely,
Napier Engineering, Inc.
