Re: Road Crossing request
Brenek No. 1
Tom Green County

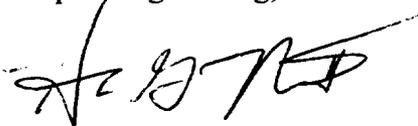

Dear Sir:

Star Production, Inc. has recently drilled and completed an oil well in Tom Green County two miles north of Vancourt. This well is the Brenek Unit No. 1. Star is requesting permission to cross Lee road with a low pressure two inch polyethylene pipe flow line encased in an 8 5/8" vented conduit. This flow line will transport oil, water and some gas from the well to an existing tank battery at an average flow line pressure of 25 psig. The pressure rating of the polyethylene pipe is 190 psig. There will be three pipe segments placed in the crossing, however only one will be utilized. The other pipe segments will be inactive and will be in the crossing for replacement line purposes.

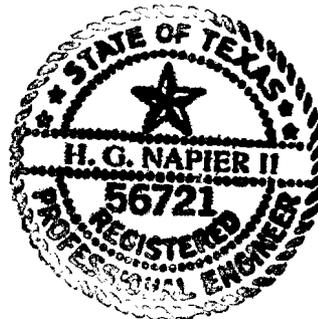

The crossing will be 300 feet north of the intersection of Lee road and Brenek road. This crossing will be in the dirt/gravel portion of Lee road, and will not disturb any pavement. The conduit and flow line will be buried 48" below the lowest point below the road, with 2" vents on both sides of the road. Enclosed is a diagram of the proposed road crossing, surveyor's plats of wells and roads.

I have enclosed a check for \$500.00 for the road crossing fee. Should you have any questions concerning this matter please contact Scott Henderson at 325-437-9747 at the office of Napier Engineering Inc., or on his cell phone at 325-668-9124. I can be reached at 325-437-9747.

Sincerely,
Napier Engineering, Inc.
