Re: Sole Source Statement

Dear Gary:

On behalf of Manatron, Inc., I wish to thank Tom Green County for its continuing use of Manatron's suite of records management software and services.

Manatron's Anthem suite of records management and imaging software is currently deployed in the Tom Green County Clerk's office. Included within this suite are specific modules for:

- Land Records
- Internet Public Access
- Birth & Death Vital Records
- Texas Vitals Interface (TER)
- Marriage Licenses
- Automated Indexing (aiIndex)
- Automated Redaction (aiRedact)
- NetMinutes

Other integrated Anthem modules that are currently available in Texas but not licensed by the County include:

- eRecording
- Courts Imaging
- AgendaLink

Manatron utilizes a proprietary integration program to tightly integrate workflow processing within Anthem under a common user interface. Support of these integrated components is available only through Manatron to Tom Green County on a sole source basis. Enhancements and augmentation to the core software or its integration components may only be obtained from Manatron on a sole source basis. Manatron does not support authorized distributor or dealership programs, and supports the end users of its product directly.

Under the Manatron's License and Support Agreement the County is entitled to on-going software enhancements which include periodic generation upgrades. Generation upgrades allow our customers to modernize their software investment by migrating the underlying architecture of like modules to current software standards and capabilities. Our latest generation, A2, is the successor to the Anthem platform.

In addition, Manatron offers a menu of specialized services that utilize domain knowledge to access Anthem and A2 software modules and program code. These services are designed to address the specific needs of our customers and include:

- Utilization consulting and training
- Data conversion & utilities
- Database normalization
- Online indexing and scanning
- Export & film archival services
- Redaction processing
- System hosting

MANATRON

- Disaster recovery
- IT technical & support services

If there are any questions on any of these software systems or services, I can be reached at 972.839.7415 or by email at john.rickerby@manatron.com. Thank you again for the opportunity to server Tom Green County.

Sincerely,

John Rickerby
