Tom Green County Treasurer

FY 12 Monthly Report
November 2011

THE STATE OF TEXAS ()
COUNTY OF TOM GREEN ()
AFFIDAVIT ()

The Treasurers' Monthly Report includes, but not limited to, money received and disbursed; debts due to (if known) and owed by the county; and all other proceedings in the treasurer's office that pertain to the Financial Standing of Tom Green County. {LGC 114.026(a)(b)}

The Treasurer's Books and the Auditor's General Ledger agree. The Bank Statements have been reconciled; any adjustments have been noted.

Special reports itemizing contributions; monthly yield; and portfolio holdings pertaining to the "Beacon of the Future" fund are included. These reports are typically one month behind the counties reporting period. For county purposes, all contributions are hereby accepted {LGC 81.032 }

The affidavit must state the amount of the cash and other assets that are in the custody of the county treasurer at the time of the examination. {LGC 114.026(d)} **\$14,863,306.95 Month Ending Balance**

As a matter of internal accounting procedure, any interest earned that is posted by financial institutions to our accounts on the last business day of the month is not included in the combined statement of receipts and disbursements until the following month. The total amount of deposits in custody as of the date of this report is the amount of deposits per the combined statement of receipts and disbursements plus the interest earned amount on page 5 of this same report.

The Treasurers' Monthly Report has been submitted and the Bank Reconciliation are pending review by Auditor. {LGC 114.026(b)}

All investments are in compliance with both the Public Funds Investment Act and the Tom Green County Investment Policy. The investment strategy is passive, which maintains a liquid cash flow and safety of the investment as priorities. As your Treasurer I keep a watchful eye to ensure that the "return of our principal" takes precedent over the "return on our principal". {GC 2256.023}

Therefore, Dianna Spieker, County Treasurer of Tom Green County, Texas, who being fully sworn, upon oath says that the within and foregoing report is true and correct to the best of her knowledge.

Filed with accompanying vouchers this 20th day of December, 2011.

As expected, benchmark U.S. interest rates remained anchored to virtually zero during the month as the Federal Reserve maintained its ultra-accommodative monetary policy that it initiated almost three years ago. However, market interest rates moved higher across the cash yield curve amid encouraging signs that the U.S. economy would avoid a double-dip recession and that the eurozone would finally resolve its long-festering sovereign debt crisis. The biggest upward moves in cash yields were concentrated among longer-dated securities; one-month Libor, for example, closed up only 0.6 basis points to 0.245%, while three month Libor rose 5.5 basis points to 0.429%, six-month Libor climbed 6.2 basis points to 0.620%, and 12-month Libor increased 7 basis points to 0.936%. At the extreme short end of the curve, overnight rates — which had occasionally been negative in recent months — remained mostly above zero.

The marginally improved economic outlook was based on a combination of data and sentiment. As the month began, pessimism had risen to levels that all but assumed the U.S. economy would slip into another recession and that the debt crisis in Europe would continue to threaten the global banking system. Investors also fretted that China would be unable to push inflation back within an acceptable range without popping that country's large property bubble. Given how low the "expectations bar" had been set, any good news — no matter how small or tenuous — was bound to have an impact on cash yields.

From a fundamental perspective, the U.S. economy expanded by 2.5% in the third quarter, defying bearish prognostications that a recession was already underway. Near the end of the month, a summit of European leaders calmed investor fears about another global financial crisis. Japan also eased monetary policy and China hinted it would do the same in response to three consecutive months of contraction within its manufacturing sector.

The Federal Reserve's so-called "twist" operation, in which the central bank sells shorter-dated securities and uses the proceeds to buy longer-term paper, so far has had little impact on the cash market. Demand for the roughly \$9 billion of money-market eligible securities that the Fed has sold to date has been so strong that any upward pressure on ultra short-term yields has been minimal at most. However, we believe that Operation Twist could at least put a floor under overnight rates, thus

Definition of Weighted Average Maturity (1) & (2)

*(1) This weighted average maturity calculation uses the SEC Rule 2A-7 definition for stated maturity for any floating rate instrument held in the portfolio to determine the weighted average maturity for the pool. This rule specifies that a variable rate instrument to be paid in 397 calendar days or less shall be deemed to have a maturity equal to the period remaining until the next readjustment of the interest rate.

*(2) This weighted average maturity calculation uses the final maturity of any floating rate instruments held in the portfolio to calculate the weighted average maturity for the Pool.

Definition of Average Monthly Yield (3)

*(3) This current yield for TexPool Prime for each date may reflect a waiver of some portion or all of each of the management fees.

supporting interest rates on repurchase agreements, an asset class that represents a significant weighting in TexPool.

Given the recent configuration of global risk factors, we believed that the prudent course was to maintain additional liquidity to meet the seasonal demand for funds while protecting against the elevated possibility of extreme market volatility. Assets began to flow back into the pools in October, however, following the typical seasonal pattern. Although the inflow is expected to be temporary, we were able to find value in short-term agencies and commercial paper, and in longer-term callable agency and floating rate structures.

90-Day Treasury Bill is a short-term debt instrument backed by the national government. These are used to collect immediate cash to meet outstanding obligations.

Any private investor can invest in a Treasury bill. The 90-Day Treasury Bill is a weighted average rate of the weekly auctions of 90-Day Treasury Bills.
