UNDERGROUND UTILITY CROSSING OF COUNTY ROADS

DATE: 4-16-14

TO: Tom Green County Commissioners Court  
122 W. Harris  
San Angelo, TX 76903

LOCATION OF PROPOSED CROSSING: 2861  
Country Club Rd - Down Center  
of old Railroad Track on  
Bed

The Tom Green County Commissioners offer no objection to the location on the right-of-way of your proposed Water Line line as shown by accompanying drawings and notice dated 4-16-14 except as noted below.

It is expressly understood that Tom Green County does not purport, hereby to grant any right, claim, title or easement in or upon the highway, and it is further understood that Tom Green County may require the owner to relocate this line, subject to provisions of governing laws, by giving thirty (30) days notice.

Steven Hoelscher shall hold harmless and indemnify the Commissioners' Court of Tom Green County, Texas, against any and all damages to property or injuries to persons caused by the proposed construction, and by acceptance of this approval agrees to make all changes and alterations to said utility lines as may be required in connection with alteration, paving or relocation of any public road, without cost to Tom Green County.

All work on the highway right-of-way shall be performed in accordance with Precinct Commissioner's instructions. The installation shall cause minimum inconvenience to traffic and adjacent property owners. Special specifications for placing this utility line are as follows:

You must contact Commissioner or Road Superintendent Rayman Torres at Prec 2  
and Aubrey de Cordova Comm. Pct 2

1. The line shall be placed through hole bored beneath road.
2. The line must be cased, or heavy wall pipe must be used, to extend from right-of-way line. However, the road may be cut if permission of the Precinct Commissioner is received. If the road is cut, the trench must be water compacted to prevent subsidence of the surface, and the surface must be restored to its original condition.

3. All borings on paved highways shall extend for the full width of the paving and ten (10) feet on each side thereof, or for the full width of the road bed in all cases.
4. The casing shall be of approximately the same diameter as the hole bored, or cut as the case may be.
5. All pipe or lines shall be well covered beneath grade line in ditches in order not to interfere with the blading of ditches. 60" cover at lowest point. Electric lines must be 60" at lowest point. Telephone lines must be 48" at lowest point.
6. Must comply with all State and Federal Laws.
7. **Will insure that Contractor or sub-contractor will not operate track type vehicles on or across County Roads.**
8. **Contractor is liable for all damages to county roads and if repairs are necessary, for the cost of those repairs.**
9. **You must attach a copy of the Tom Green County road map with the location noted as to where you plan to bore.**
