Budget Request Plan for FY 2015:

Last year we completed a conversion from film to digital images for download to the internet, from 1982-1994 of our Real Property Records. The projected figure that we received for the remainder of the real property records was \$1,195,895.99 @ \$0.2416 per image.

As the older books wear from usage, we are trying to have the older historic books restored and deacidified. These are both very costly projects, so we are trying to utilize the revenue from funds 30 and 32 for these projects, as funds are available.

We are utilizing our free time with the back scans of the documents required to be restored and or preserved as ordered by the Supreme Court. Digitizing more records will also require more or larger servers in the future. These funds can also be utilized for that purpose.

We are requesting that Fund 30 and Fund 32 each be raised to \$200,000.00, doubling the past budget, since the statute has doubled those fee funds in order to expedite the restoration means and methods.
