

Dear Tom Green County Commissioner Court:

For one hundred years the Texas A&M Forest Service has been providing leadership in protecting and sustaining the state's trees, forests and related natural resources. The first efforts of a few forest patrolmen on horseback in East Texas have grown into today's network of protection statewide. TFS makes Texas stronger by imparting best land management practices to landowners, grants for training and equipment to fire departments, and information, tools and resources to communities. In the recent drought affecting our state we truly experience the impact they make on each of our safety and how much we appreciate the role they play across our state.

To help celebrate their 100 years of service to our community, the Tom Green County 4-H Program will be planting a commemorative Bur Oak tree in honor of the Texas A&M Forest Service as our 2015 One Day 4-H Community Service Project. We would like to ask for the Commissioner Courts partnership in this recognition and education event. We would like for the tree planting to be an educational experience by inviting our county officials and community out to help plant the tree.

As part of the statewide One Day 4-H Community Service project, we have arranged to plant the tree on Saturday, October 10, 2015 starting at 10:30AM, at the Tom Green 4-H building where the tree could be planted in order for it to have a long-healthy life. The location will be at the Tom Green 4-H Building property where its importance will be seen and appreciated by the community.
