PROPOSAL TO INSTALL VOTESAFE™ E-POLL BOOK VONA HUDSON | TOM GREEN COUNTY ELECTIONS ADMINISTRATOR

Thank you for the opportunity this proposal reflects. VOTEC provides election management and voter registration software and services to counties throughout the USA. We have been working in this field since 1979 and are considered the proven leader of election management technology solutions. VOTEC proposes to deliver and stage its VoteSafe electronic pollbook. We will appoint a project coordinator to work with Tom Green County's staff throughout the acceptance process, always adhering to any contract and Texas State election management requirements.

VoteSafe consists of two components: 1) PollPower™ command and control module, and 2) WelcomeVoter™ Kiosk. The WelcomeVoter Kiosk is a uniquely configured electronic poll book and voter information solution. It features a voter-facing information display screen akin to the familiar consumer point-of-purchase experience. This approach engages the voter as he/she navigates the authentication and validation process with the poll worker. WelcomeVoter saves time and imparts confidence throughout the voter check-in process as the tablet screen displays instructions and feedback to the voter. Other benefits include:

- Voter privacy
- Reduction of poll worker responsibilities
- Unique accessibility features
- Multiple language display
- Minimization of communication errors

Where appropriate to the voting system, WelcomeVoter's printer generates a personalized voter credential. This credential is a slip of paper containing data elements such as ballot style, unique ballot number, date and timestamp, polling place ID, precinct ID, and voter ID with voting system appropriate information duplicated in machine-readable bar code format.

Expert Election Management Software

CONFIDENTIAL

Based on your specifications, we propose:

Field System with Live Connectivity PollPower Management Software, Training, support, project management service package, VEMACS near real time VR integration, and proven Texas voting system activation.

DESCRIPTION	QTY	UNIT	TOTAL
BUNDLED KIOSK PRICING CONFIGURATION INCLUDES: LAPTOP, MOUSE, STYLUS, TABLET, BROTHER PRINTER, MAG SWIPE READER, EQUIPMENT PLATFORM HARDWARE AND CUSTOM CASE, GROUND SHIPPING, WINDOWS LICENSE.	48	\$991.38	\$47,586.24

All prices guaranteed for 1 year. Basic service package to include: pre-deployment consultation, configuration setup, staff orientation, webinar training.

All VOTEC VoteSafe electronic Pollbook hardware comes with a 1 year (from date of delivery) warranty. VOTEC offers an extended annual warranty for electronic and electro-mechanical components for subsequent years at a cost of 4% (4 percent) of the original price (\$39.66 per Kiosk, per year).

VOTEC has experience interfacing with all voting system providers. Some systems simply use a bar code printout, others require card activation. Voting system hardware not included in this proposal.

Mechanical components including the case, tray, tablet arm, cables, power cords, and styli are warrantied at no additional cost as long as software support is being purchased.

Tom Green County would like to enter into a contract to buy WelcomeVoter Kiosks and will further this matter in coming days. This *agreement of intent* does not commit "Customer" to purchase or lease Kiosks but only to properly plan for this conversion. Parties mutually agree not to disclose information covered in this proposal except where necessary to negotiate specific contract terms. This proposal is good for 30 days.
